

先由圖確定高度與系統

軌道光滑，支持力始終垂直瞬時位移

只有重力做功時， $K + U$ 保持不變

$$\frac{1}{2}mv_A^2 + mgh_A = \frac{1}{2}mv^2 + mgh$$

$$E = K + U = 50\text{ J}$$

A
 $v = 0$

B
 $v = 10\text{ m/s}$

C
 $v = \sqrt{40}\text{ m/s}$
