

同一液體、同一水平面壓力相等；液面較低的一側壓力較大

開口式：氣體端較低

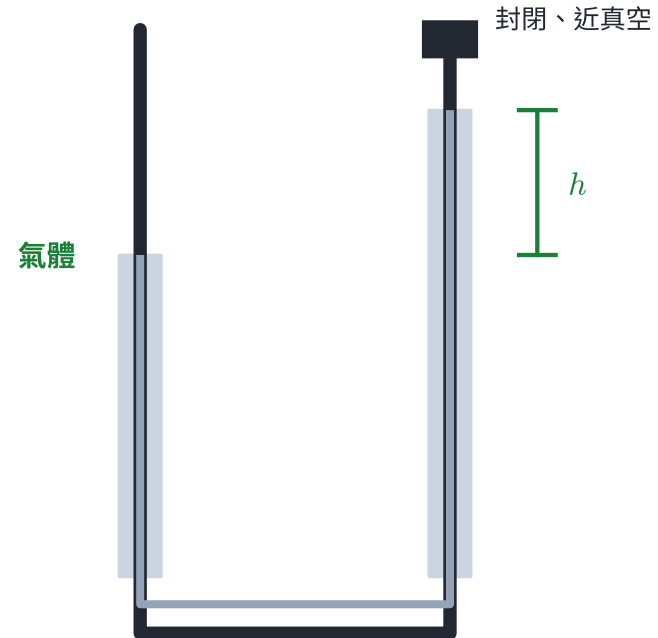

$$P_g = P_{atm} + 120 = 880 \text{ mmHg}$$

開口式：氣體端較高

$$P_g = P_{atm} - 120 = 640 \text{ mmHg}$$

閉口式：上端近真空

$$P_g = 380 \text{ mmHg}$$
